## ABSTRACT

In this covid pandemic situation, small-scale entrepreneurs suffered due to lockdown as well as common people were unable to get most of the services at their doorstep. In the current scenario, we people are so into technology that we don't want to make too many efforts to get things done, we always wanted an easy way to get things done in less time as well. Suppose any of user's appliances breaks down, let's say your cooler breaks down in hot summer then it would be a very tedious task to go out in summer and find a repairing person to overcome such situation our application **"CityService"** will come into the picture. So, this project is all about providing the household services at user's doorstep by finding the nearest professional at your fingertips. Similarly, the app would help small-scale entrepreneurs to grow faster and reach out to many customers in the city.
